

Mike Mayhew

It has happened; our Founder Chairman has retired from the Post.

In 2005 Mike with a group of others set up the Clevedon & District Model Boat Club. Their aim was to have a club run by the members for the members and to do this it was decided not to have a committee. There would be a Chairman Secretary and Treasurer; the club would promote the building and sailing of all types of craft.

Mike brought to the club his extensive knowledge of boat-building which he did not stint when it came to sharing with others. Knowing how things work on full sized boats helped him explain to others how they could work on a model. This knowledge and time has been freely given to many others, and his ability to see how everyday items can be adapted to enhance a model has to be seen to be believed. Anything a person is unsure of or doesn't know, the answer is "Ask Mike".

On behalf of all club members we wish Mike all the best for the future with thanks for all his help and advice over the years, and it is to be hoped that he will continue to provide this help and support to all as an 'ordinary' club member.
